

Crochet Provisional Cast-on

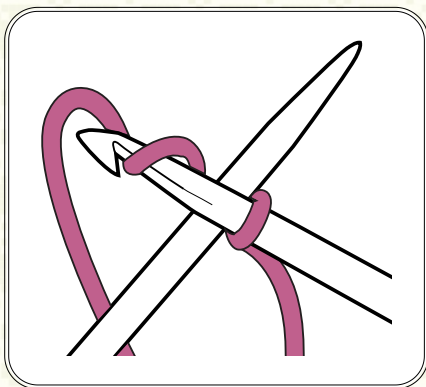

WORKING THE CAST-ON

This cast-on forms a row of stitches in waste yarn. These can be removed later to pick up the stitches above them.

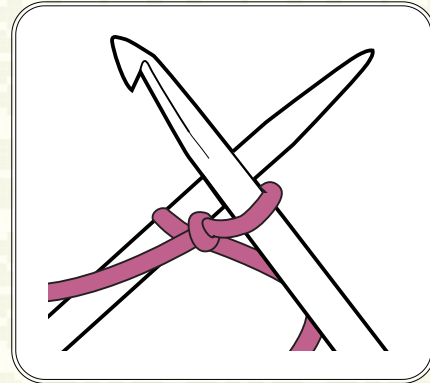

You will need a knitting needle, waste yarn, and a crochet hook to work the cast-on.

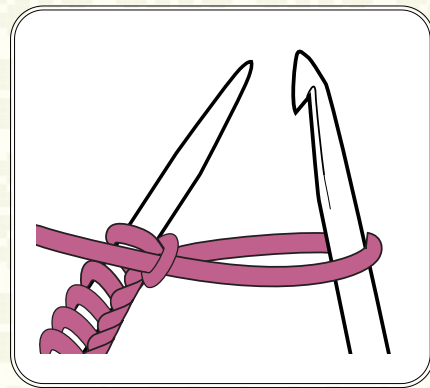

- 1) Make a slipknot and place it on the crochet hook.

- 2) Holding the hook in front of the needle, take the yarn behind the needle and wrap it around the crochet hook as shown.

- 3) Use the hook to pull the wrapped yarn through the loop on the hook.

- 4) Repeat steps 2–3 until you have cast on the desired number of stitches.
- 5) Break off the yarn leaving a short tail. Pull the tail through the loop on the hook and proceed according to the pattern.

REMOVING THE CAST-ON

Carefully pull the tail of yarn out of the loop it was pulled through in step 5. Then slowly pull out each loop in the cast-on chain, placing each stitch it secured onto your needle as you do so.
